About Me

Lead UI/UX Designer with 12+ years of experience designing scalable SaaS platforms, enterprise dashboards, and data-driven applications across banking, healthcare, and AI domains. Expert in user research, interaction design, usability testing, and design systems, with a strong focus on conversion optimization, task success rate, and user engagement.

Proven ability to collaborate with cross-functional teams in Agile environments and deliver high-impact, KPI-driven design solutions using tools like Figma, Adobe XD, and AI-assisted workflows.

Skill set

CORE SKILLS

- UX Design, UI Design, Product Design
- User Research, Usability Testing, A/B Testing
- Wireframing, Prototyping, Interaction Design (IxD)
- Information Architecture, User Flows, Journey Mapping
- Design Systems, Component Libraries
- Data Visualization, Dashboard Design
- Conversion Rate Optimization, KPI-driven UX
- Responsive Design, Accessibility (WCAG basics)
- Agile, Scrum, Stakeholder Collaboration

TOOLS & TECHNOLOGIES

- Figma, Figma Make,
- Sketch,
- Adobe Photoshop, Adobe Illustratr
- Google Stitch,
- Claude AI,
- GitHub Copilot
- HTML, CSS (Basic),
- Responsive Frameworks
- Jira, Agile Workflow Tools

Experience

Lead UI/UX Designer

BizAcuity Solutions Pvt Ltd | Sep 2023 – Present | Hyderabad

- Led UX design for AI-powered SaaS platforms in banking and healthcare domains
- Designed data-driven dashboards, improving decision-making efficiency by ~30%
- Built and scaled design systems, reducing design inconsistencies by 40%
- Collaborated with product managers and developers in Agile sprints to deliver user-centric solutio
- Applied UX metrics (conversion rate, task success rate, drop-off analysis) to optimize user flows
- Integrated AI tools (Figma AI, Claude) to accelerate design workflows by ~25%

Senior Information Designer

Gramener | Jun 2016 – Sep 2023 | Hyderabad

- Designed analytics dashboards and data visualization solutions for finance, healthcare, and media
- Improved user engagement and usability through intuitive visual storytelling
- Conducted user research, persona creation, and usability testing
- Delivered end-to-end UX solutions from wireframes to high-fidelity prototypes
- Worked closely with stakeholders to translate complex data into actionable insights

UI Designer

Sai Sri Technologies | Sep 2014 – Jun 2016

- Designed web and e-learning interfaces, improving user experience and accessibility
- Created branding, product illustrations, and responsive layouts

UI Designer / Animator

LOGICPROG Technologies | Aug 2013 – Aug 2014

- Developed interactive animations and educational content for engineering platforms

Graphic Designer

Caliber IT Solutions | Jan 2010 – Aug 2013

- Designed logos, websites, and marketing visuals for digital products

Animator

Rush Softech Pvt Ltd | Jun 2009 – Dec 2009

- Created e-learning content for technical education programs

Selected Projects / UX Case studies

AI-Powered Analytics Dashboard (Banking / SaaS)

- Led end-to-end UX design for a data-driven financial dashboard, improving decision-making speed by ~30%
- Conducted user research and stakeholder interviews to define key KPIs and user pain points
- Redesigned information architecture and navigation, reducing task completion time by 25%
- Created interactive prototypes in Figma, enabling faster stakeholder alignment and reducing rework
- Improved data visualization clarity, increasing user engagement and dashboard adoption
- Applied A/B testing and usability testing to optimize workflows and reduce drop-off rates

Healthcare Data Visualization Platform

- Designed UX for a health analytics platform used by clinicians and administrators
- Simplified complex medical data into intuitive dashboards, improving task success rate by ~35%
- Built user personas and journey maps to align product with real-world healthcare workflows
- Enhanced accessibility and readability using typography and color system improvements
- Collaborated with cross-functional teams to deliver scalable, responsive UI solutions

AI-Driven UX Workflow Integration

- Integrated AI tools (Figma Make, Claude, Google Stitch) into design workflows
- Reduced design iteration time by ~25% through rapid prototyping and content generation
- Automated wireframing and UI exploration, improving productivity and consistency
- Enabled faster design-to-development handoff using structured components and documentation

Enterprise Dashboard (Finance / Media)

- Designed high-performance dashboards for large datasets in finance and media domains
- Improved data comprehension and storytelling, leading to better stakeholder decisions
- Standardized design systems and reusable components, reducing design debt by ~40%
- Conducted usability testing sessions, identifying friction points and improving UX flows

E-learning Platform UX

- Designed interactive learning interfaces and content structures
- Improved user engagement and retention through better content hierarchy and navigation
- Created animations and micro-interactions to enhance learning experience
